SEWALLS FALLS BRIDGE

This week's construction activities on the Sewalls Falls Bridge included installation of temporary steel sheets around the north abutment footing area; pile driving for the north abutment footing; removal of temporary structures used to support the existing north truss; and dismantling of the existing steel grid decking on the south truss.

Next week it is anticipated that the contractor will finalize the construction of the south abutment; continue pile driving for the north abutment footing; install temporary supports for the existing south truss; and install water main in the south end of the project.

OUTDOOR SKATING

Despite Mother Nature's best attempts to close down our outdoor skating, the ice rink at White Park and the skating area at Rollins Park are still open for skating. There is some light snow in the forecast for tonight, but staff should be able to clear off these two areas in order to have them open for skating by noon on Saturday. Our skating ponds, however, are not conducive for safe skating. Please keep off the ponds at White Park and Beaver Meadow Golf Course until further notice.
