Re: Concord Municipal Airport Design Taxiway B Project, Concord, NH
FAA Environmental Review-Section 106 Review Request

Dear Mr. Gorham:

This letter is in response to your letter requesting review for the above referenced proposed project. The Division of Historical Resources (DHR) is in receipt of the Phase IA Archaeological Sensitivity Assessment for the Concord Municipal Airport, Concord, NH prepared by Kathleen Wheeler of Independent Archaeological Consulting (IAC) of Portsmouth, NH.

The DHR concurs with the information and recommendations that are provided and finds that the report is considered acceptable as written. The report clearly states that Areas B, C, D, and F are not considered sensitive for archaeological resources and no further survey is recommended. Areas A and E are considered sensitive for archaeological resources and will require subsurface testing prior to any ground disturbing activities.

The DHR looks forward to continued consultation on this project with regard to the results of archaeological testing and with review of effects on the eligible National Register properties associated with the project plans.

Thank you. If you have any questions, please call me at 271-2813. Good luck.

Sincerely,

Edna Feighner
Review and Compliance Coordinator, NHDHR

NH DIVISION OF HISTORICAL RESOURCES

Date: 3/22/11 Site No. DHR Review No. 1773
Project: Environmental Assessment, Municipal Airport
Report: Phase IA Archaeological Sensitivity Assessment, Concord Municipal Airport, Concord, NH
Other Parties: IAC, DOT/Aeronautics, Drukker/City, Jacobs Engineering

NEPA and Sec. 106 of the NHPA require consultation with the SHPO to ensure the review of all actions covered by these acts relative to historical and cultural properties. The review should focus on the project's impacts pertinent to this act.
