Snow More!

It is almost the end of February and by now most people are getting sick of the snow and ready for spring. Concord, New Hampshire roughly averages about 60.8 inches of snow per year and has been receiving its fair share this season.

The General Services Department of the City of Concord has had their work cut out for them with snow removal efforts. The number one priority is to make sure the streets of Concord are clear for vehicle safety. Our crews work hard to operate these trucks with as much care and attention as possible. Often times, they work on very tight roads with very big plows and have to clean up as fast and efficient as possible.

The trucks are operated to lay down our treated salt when necessary to provide drivers with road traction and to help melt away any ice.

Although we are ready for winter to be over, our winter operations are still in full force. Just remember that our crews are here to help make the end of this season more bearable with better road conditions.

If you see us, give us a wave - we love to wave back!

Little Pond, Big Leak

There was a pipe burst Wednesday night on 2 Little Pond Road that caused water to be restricted from Auburn Street and Penacook Street.

Crews worked diligently to resolve this issue from Wednesday night into Thursday night. The problem has since been fixed and water has been restored to all of those affected.
