Recycled Parking

Parking along Beacon Street would create an attractive new access to the park. This would not only improve pedestrian access to the park, but also increase safety and security for the area.

Recommendations

- Provide a public greenway along Beacon Street
- Install a new crosswalk at the intersection of Beacon and Beacon Street
- Create a new entrance at the south end of the park
- Improve pedestrian access to the park
- Increase visibility of the park from the street
unsuitable soils for buildings built in areas with.

- For buildings built in areas with
- Residential subdivisions
- should be designed with the building
- building and the pond. This entrance
- be a small path with seating between the
- share house during the winter. This will
- associated with it will be a focus for
- will have a year-round bathroom facility
- offices for the Recreation Department,
- will be located adjacent to the new parking
- A new multipurpose building is proposed
